Functions of different heads

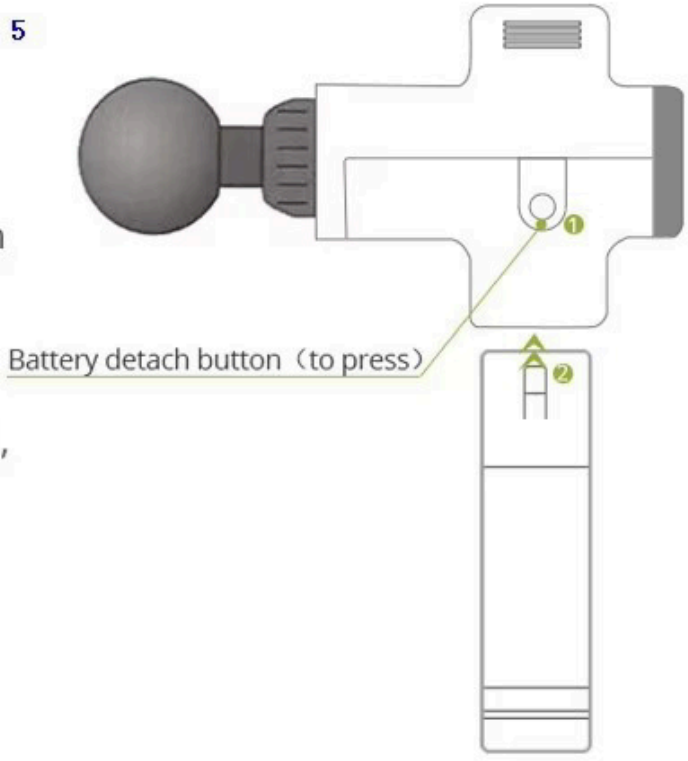

Operate Steps

1. Install the battery. Aim ❷ at ❶ and push in.
2. Turn battery switch ❺ "On", and the power indicator lights ❹ will turn on, 4 green and 1 red light indicate the capacity, it needs to be charged when only the red is still on.

3. Choose the right massage head depend on the area you are going to massage and install it on the machine.
4. Press power button ❸, it begins to work. 1 green light means level 1; press twice, 2 green light will turn on, means level 2; press 3 times, 3 green lights will turn on, means level3; press 4 times, the motor will turn off; press again, it will restart from level 1.
5. Turn off the power button on the battery, press detach button ❶, and pull the battery gently to detach.

About Battery

1. It needs 2.5-3 hours to recharge when the power is exhausted, it can work for 2 hours when it's fully charged. When charging, the power indicator will turn on, for safety case, the motor won't turn, please do not massage when charging.
2. As shown in the picture, aim ② at ① and push in to install, press detach button and pull to uninstall.
